

BOREAS TGB-04 NSA-BP Tower Flux and Meteorological Data

Summary:

The BOREAS TGB-04 team measured the exchange of heat, water, and CO₂ between a boreal forest beaver pond and the atmosphere in the NSA for the ice-free period of BOREAS. The data cover the period of May 28 to September 18, 1994.

A guide document which includes more information about this data set can be found at http://daac.ornl.gov/boreas/TGB/tgb4flux/comp/TGB04_NSA-BP_Flux.txt.

ORNL DAAC maintains information on the entire [BOREAS Project](#).
