

FOREST INVENTORY: SANTAREM - III

SAN_A01B_2016_2018_INVENTORY

1.0 GENERAL INFORMATION

The Forest Inventory Santarem- III (SAN_A01b_2016_2018_Inventory) was carried out in Belterra municipality, Pará, Brazil. A total of 7 50x50m plots were measured in 2016 and 2018.

Trees with diameter at breast height (DBH) equal to or greater than 35cm were accounted for and measured within the plot area (see Fig. 1 - A) whereas trees with DBH equal to or greater than 10cm were only measured within the subplot area (see Fig. 1A- grey area) in 2014. In 2018, all individuals were remeasured and the recruits (DBH equal to or greater than 10cm) were measured within the subplot area of 20x50m (Figure 1B – grey area).

FIG 1. REPRESENTATION OF THE INVENTORY PLOT CONFIGURATION IN 2016 (A) AND PLOT CONFIGURATION FOR RECRUITS IN 2018 (B).

2.0 INVENTORY DATA RECORDED - .CSV FILE CONTENT

For each tree the following measurements were recorded:

area: A code name given to the area.

plot: the plot identification code.

tree: tree number.

common.name: tree common name.

scientific.name: tree scientific name.

family.name: tree family name.

type(class) Divided into four classes:

Liana (L): woody vines, inclusion was based on the position of the vine at 1.3 m above the ground, not the rooting position.

Palms (P): leafed palms, inclusion based on the diameter at the ground surface. Litter was removed from around the base for measurement.

Trunked palms (Pt): palms with a trunk measurable at 1.3 m.

Other (O): Trees.

DBH (cm): Diameter at breast height, 1.3 m above the ground.

dead: Standing dead.

Hcom (m): tree commercial height.

Htot (m): tree total height.

RN: (m) Radius to the north of the tree crown.

RS: (m) Radius to the south of the tree crown.

RE: (m) Radius to the east of the tree crown.

RW: (m) Radius to the west of the tree crown.

Date (ISO 8601): date

UTM_Easting: X coordinate of tree individual location calculated based on measurements of tree X position with respect to the transect.

UTM_Northing: Y coordinate of tree individual location calculated based on measurements of tree Y position with respect to the transect.

3.0 COMPLEMENTARY INFORMATION

NA = not available/not applicable

Variables collected in the forest inventory carried out in 2016 or 2018 will have it stated in the variable name. Example: "DBH.2016" - Diameter at breast height collected in 2016.
