Get Data

Revision date: September 30, 2010

Summary:

This data set includes 16 zipped archives of shapefiles of cities, rivers and streams, roads, and study area boundaries of several Amazonian study sites: Altamira, Santarem, Bragantina, and Ponta de Pedras, in the state of Para, and one site at Machadinho D'Oeste, in the state of Rondonia. Data from Brazil were digitized from Instituto Nacional de Colonizacao e Reforma Agraria (INCRA) maps and other data from Instituto Brasileiro de Geografia e Estatistica (IBGE). These products were prepared in the 2000-2004 time period. The data of creation for the source material is unknown.

Implementation of the LBA Data and Publication Policy by Data Users:

The LBA Data and Publication Policy [http://daac.ornl.gov/LBA/lba_data_policy.html] is in effect for a period of five (5) years from the date of archiving and should be followed by data users who have obtained LBA data sets from the ORNL DAAC. Users who download LBA data in the five years after data have been archived must contact the investigators who collected the data, per provisions 6 and 7 in the Policy.

This data set was archived in October 2010. Users who download the data between October 2010 and September 2015 must comply with the LBA Data and Publication Policy.

Data users should use the Investigator contact information in this document to communicate with the data provider. Alternatively, the LBA Web Site [<http://lbaeco-archive.ornl.gov/>] in Brazil will have current contact information.

Data users should use the Data Set Citation and other applicable references provided in this document to acknowledge use of the data.

Time period:

- The data set covers the period 1985/01/01 to 2004/12/31.
- Temporal Resolution: one time

Platform/Sensor/Parameters measured include:

- TOPOGRAPHIC MAP / DIGITIZER / LAND MANAGEMENT
- TOPOGRAPHIC MAP / DIGITIZER / LAND COVER

3. Data Application and Derivation:

Data to be used in spatial analysis of land use and land cover change.

4. Quality Assessment:

Topographic maps were georeferenced with RMS<1.0; digitization of topographic maps was conducted at the finest scale possible while still maintaining visual orientation of the rest of the map to allow for accurate tracing and digitization.

5. Data Acquisition Materials and Methods:

Data from Brazil were digitized from INCRA maps and other data from IBGE (Brazil).

Please refer to the following websites:

- INCRA (<http://www.incra.gov.br>)
- IBGE (<http://www.ibge.gov.br>)

Shapefiles were created from digitized maps that were scanned and georeferenced to previously rectified images/data using ESRI-ArcGIS 9.1 and ERDAS Imagine 8.7.

6. Data Access:

This data is available through the Oak Ridge National Laboratory (ORNL) Distributed Active Archive Center (DAAC).
