

Centerville Hourly Mean and Daily Daytime Average CO₂ Mixing Ratio Data from the Ring 2 Tall Tower Network in the U.S. Midwest

FILE NAMES:

ce_level1_hourly
ce_level1_dda
ce_level2_hourly
ce_level2_dda

DATA FORMAT: .csv

DATA VERSION: 20101109

STATION NAME: Centerville

STATE: Iowa

COUNTRY/TERRITORY: USA

LATITUDE: 40.7919 N

LONGITUDE: -92.8775 W

ELEVATION: 286 m AMSL

CONTRIBUTOR: Pennsylvania State University (PSU)

OBSERVATION CATEGORY: Air sampling observation

NUMBER OF SAMPLING HEIGHTS: 2

SAMPLING HEIGHTS: 30 m AGL (level 2), 110 m AGL (level 1)

PARAMETER: CO₂ dry mole fraction

TIME PERIOD: 2007 - 2009 (inclusive; all available data)

ACTUAL SAMPLING DATES:

Site Code	Full Name	Latitude (degrees N)	Longitude (degrees W)	Elevation (m AMSL)	Sampling Heights (m AGL)	Sampling Dates
CE	Centerville, Iowa	40.7919	-92.8775	286	Level 2 (30)	04/30/2007-10/31/2008
					Level 1 (110)	04/28/2007-11/04/2009

MISSING DATA: -999 [NOTE: The missing value -999 denotes missing CO₂ data, time, or both, or when error is estimated to be > 0.5 ppm (not recommended to be used). There are cases where both Time and CO₂ are -999, and also cases where only CO₂ is -999. This is an artifact of the data processing. When only CO₂ -999 indicates that the error is likely to be greater than 0.5 ppm, whereas when both Time and CO₂ are -999 indicates missing data (instrument off due to malfunction).]

TIME INTERVAL: hourly average or daily daytime average (dda; 12:00-17:00 local) (Note: Except during hours in which the field standards were sampled, the upper level (110–140 m AGL) at each site was sampled for 45 min and the lower level (30 m AGL) was sampled for 15 min of each hour. These values were then used to compute averages at hourly resolution. Daily daytime averages were calculated from hourly values between 12:00–17:00 local standard time.)

MEASUREMENT UNIT: ppm

MEASUREMENT METHOD: CRDS (Picarro) (NOTE: Instrument serial code is provided in the data files.)

SAMPLING TYPE: in situ

LOCAL TIME ZONE: CST (UTC - 6 hours)

TIME BASIS FOR REPORTING DATES AND TIMES: Coordinated Universal Time (UTC)

REFERENCE SCALE: Traceable to NOAA scale

FAIR USE POLICY

The data available on this site are freely available. Permission to download this data, however, does not grant permission to use the information contained in that data for publication. Please contact a member of our group at co2@meteo.psu.edu before use of any such information in a publication.

TECHNICAL CONTACT: co2@meteo.psu.edu

DATA COLUMN HEADINGS:

Inst: Serial number of WS-CRDS (Picarro) instrument used to collect data

Site: 2 letter code indicating site of data collection

Level: Level of air sample. Level 1 is the higher level (110 m AGL) and level 2 is the lower level (30 m AGL).

Year: Year (YYYY)

DOY: Day of Year (UTC). DOY = 1 is January 1.

Hour: Hour of collection (HH_UTC). Hour 0 = Midnight UTC. Only applies to hourly data.

Time: Fractional day of year, decimal time (UTC). Only applies to hourly data.

CO₂ (ppm): Hourly mean CO₂ dry mole fraction in ppm or daily daytime average (dda) CO₂ dry mole fraction (12:00 – 17:00 local time) in ppm

QualityFlag:

1: error estimated to be < 0.1 ppm

- 2: error estimated to be > 0.1 ppm but < 0.2 ppm
- 3: error estimated to be > 0.2 ppm but < 0.3 ppm
- 4: error estimated to be > 0.3 ppm but < 0.5 ppm
- 5: error estimated to be > 0.5 ppm (not recommended to be used; CO₂ listed as -999)
- 0: missing data (CO₂ listed as -999)

The error was estimated based on the degree to which the daily field calibration tank measurement differed from their known values, or problems with flow rate or missing daily field calibration. The field calibration tank values for the Ring 2 sites are:

Kewanee: 360.84 and 395.48 ppm

Centerville: 361.00 and 396.14 ppm

Mead: 361.82 and 417.40 ppm

Round Lake: 337.76 and 364.16 ppm

Galesville: 360.54 and 422.89 ppm (after 11/3/08, 351.20 and 413.68 ppm)

Please contact PSU Department of Meteorology CO₂ group (co2@meteo.psu.edu) if you have any questions regarding the data.
